# DESIGN THINKING

## *in project*

**Retail Business performance, market expansion & choosing strategic products analysis**

# TABLE OF *Contents*

01 How Design thinking is applied in this project
02 Step 1: Empathise
03 Step 2: Define
04 Step 3: Ideate
05 Step 4: Prototype
06 Step 5: Test & Iteration

# Why Design Thinking matters in my project?

- Empathise to understand stakeholders
- To cover every angle of business problems
- Guide for analysis always on track
- Way to iterate the result constantly

# Step 1: EMPATHISE

## ANALYSE BUSINESS REQUIREMENTS

- Use 5W1H to analyse business requirements
- Identify Key stakeholders/ dashboard user

## ANALYSE STAKEHOLDERS

Build Empathy Map to fully understand their needs, their actions, pains & gains from dashboard

## EXPLORE DATASET

- Tables & relationships
- Content of each table
- Measures columns vs descriptive columns

# ANALYSE BUSINESS REQUIREMENTS

## 5W1H

| Who are dashboard users? | What problems will this dashboard solve? | When & Where will stakeholders view the dashboard? | Why does this analysis need to be done? | How do stakeholders make decision? |
|---|---|---|---|---|
| Senior sales manager/Senior marketing manager | Assist Senior Sales Manager on making decision: business growth, market expansion, and choosing strategic products | - Monthly / Quarterly review<br>- Strategy meeting<br>- Resources/Budget allocation meeting<br>- Business proposal | Making strategic decisions on:<br>- Where to expand?<br>- What products to invest in<br>- Resources allocation | The company is looking for growth levers with the highest probability of success.<br><br>1. Identify where growth is coming from<br><br>2. Analyze markets based on investment potential (sufficient size, growth rate,...)<br><br>3. Evaluate the quality of growth (is it profitable? is it sustainable?)<br><br>4. Select strategic products (revenue contribution, growth potential, cross-sell,...)<br><br>5. Assess different strategic scenarios<br><br>6. Take action |
| **If selecting one key stakeholder, who would it be?** | **Describe problem in 1 sentence** | | | |
| Senior Sale manager | The company is currently in a strong growth phase, aiming to increase revenue, optimize profit, and expand market share. | | | |

# ANALYSE STAKEHOLDERS

## EMPATHY MAP

### Thinking and feeling
### What does the stakeholder think & feel?

**Feel**
- Pressure to deliver growth, to make the right decisions

**Think**
- Is this growth high quality and sustainable?
- Which markets are worth further investment?
- Where are we losing money? Are these trends reliable?
- If I had to make a decision immediately, what would I do?
- What are the consequences if the decision is wrong?

### Seeing
### What does the stakeholder see?

- An overwhelming amount of data and reports from multiple departments
- All markets appear promising, and all products show growth, making it difficult to prioritize

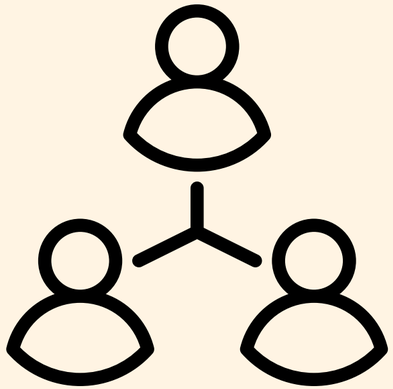
### Saying and doing
### What does the stakeholder say?

**Do**
- Make decisions under imperfect conditions
- Prioritize & Make data-driven decisions

**Say**
- Ask questions that drive strategic decision-making
- Challenge insights by questioning
- Communicate in a concise, direct, & actionable

### Pains
### What are the biggest problems & challenges?

- Large volumes of data, but lacking actionable insights and clear direction
- Unable to make clear and impactful decisions (biggest pain point)

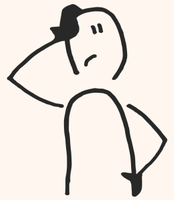


### Gains
### What are the opportunities and benefits?

- The dashboard provides deep and comprehensive insights to support decision-making
- Clearly identifies where actions should be taken
- Enables confident and fast decision-making

# ANALYSE STAKEHOLDERS

## STAKEHOLDER NEED



### What are the key questions that stakeholder want to answer?

**1. Overall Business Performance**

- What is the overall business performance across revenue, profit, and growth?
- Is growth sustainable, or is it coming at the expense of profitability?

**2. Growth Drivers & Performance**

- Which markets and products are driving growth, and which are underperforming?
- Where are we losing money or seeing declining performance?
- What are the root causes of low profitability?

**3. Customer Strategy**

How can we acquire new customers and increase retention?

**4. Investment & Expansion Strategy**

- Where should we invest to maximize growth?
- Which areas generate the highest ROI?

# EXPLORE DATASET

Orders

- Descriptive group:
  - **Order ID**
  - Customer info: ID, name, segment
  - Market: market, **region**, country
  - Product: category, subcategory, prod name
- Measures group:
  - sale, quantity, profit, etc

People

- **Region**
- Person

Returns

- **Order ID**
- Returned (True/False)

Step 2:

# DEFINE - NORTH STAR METRICS & POINTS OF VIEWS

## North star metric: What matters most to stakeholders?

| | What value you want to measure? | When the value delivery success? | Why do you choose this metric? |
|---|---|---|---|
| **NSM 1: Revenue** | Revenue | Sales are growing and achieving target growth KPIs. | Because it measures the company's scale and the effectiveness of market expansion. |
| **NSM 2: Profit** | Profit | Growth remains sustainable, with key segments maintaining profitability. | Reflects whether the growth is sustainable. |

# KEY PERSPECTIVES & POINTS OF VIEWS

**KEY PERSPECTIVES**

**BUSINESS PERFORMANCE OVERVIEW**

To understand the company's current position and performance before making any growth decisions.

**MARKET ANALYSIS**

To know what actions to take in each market.

**PRODUCT ANALYSIS**

To select products and define strategies for different product groups across different markets.

**POINT OF VIEWS**

- OVERVIEW + KEY TREND
- MARKET
- PRODUCT
- CUSTOMER
- SHIP MODE
- PERSON
- RETURN

# GROWTH FORMULAS FOR EACH PERSPECTIVE

DEEP DIVE INTO EACH PERSPECTIVE, BREAK DOWN NORTH STAR METRICS BY PERSPECTIVES

| | NSM1: Revenue | NSM2: Profit/Profit Margin |
|---|---|---|
| **BUSINESS PERFORMANCE OVERVIEW** | Revenue = Number of Orders × Average Order Value (AOV) | Profit Margin = Profit / Revenue |
| **MARKET ANALYSIS** | Revenue = Total revenue (markets)<br>= Total revenue (regions)<br>= Total revenue (countries) | Revenue = Total profit (markets)<br>= Total profit (regions)<br>= Total profit(countries) |
| **PRODUCT ANALYSIS** | Revenue = Total revenue by category<br>= Total revenue by sub-category<br>= Total revenue by product | Revenue = Total profit by category<br>= Total profit by sub-category<br>= Total profit by product |

# Step 3: IDEATE

Based on the growth formula breakdown of each perspective, brainstorm relevant insights across different dimensions of the North Star Metric.

| IDEA NAME | OVERVIEW | MARKET | PRODUCT |
|---|---|---|---|
| Layer 0 dimension: Scorecards | - Total sales, total profit, profit margin, total order, return rate, AOV, quantity, etc | Total sales, Sales growth, profit, profit growth, % new customer/total customers, % contribution, market rank, return rate, active country | Total sales, Sales growth, profit, profit growth, % contribution, return rate, active products |
| Layer 1 dimension: The metric is broken down by a single dimension (e.g., revenue over time). | - Sales/profit over time<br>- Sale/profit trend by market<br>- Sale/profit by category<br>- Sale/profit by customer segment<br>- Return rate trend<br>- Total order trend | - Growth of rev/profit by market<br>- Market contribution bar<br>- Rev growth by market<br>- Profit growth by market | - Growth/profit product matrix<br>- Category/Subcategory contribution bar<br>- Revenue growth by category /subcategory<br>- Profit growth by category |
| Layer 2 dimension: The metric is broken down by two dimensions (e.g., revenue by branch and time). | - Sale/profit by market by time<br>- Sale/profit by category by time<br>- Sale/profit by market by category | - Market x category/subcategory<br>- Market details table (sales, profit, return, etc) | - Market x category matrix<br>- Product detail table |

# Step 4 +5:
# PROTOTYPE & TEST

# THANK You
